

TransferJet Consortium exhibits at CeBIT India 2014

TransferJet Consortium will be exhibiting at CeBIT India 2014 (November 12-14, 2014) held at the Bangalore International Exhibition Center in India. This is the first time that the consortium will be exhibiting in India to showcase this unique technology allowing devices to exchange data at very high speed by means of a simple touch. The TransferJet exhibits will be located within the SD Association booth, with which the consortium has a collaborative liaison relationship. The consortium looks forward to meeting everyone at this event.

Venue Information

- Period:** November 12-14, 2014
Location: Bangalore International Exhibition Center
Booth: Hall 3, Booth A61a, within the SD Association booth
Seminar: "TransferJet Technology" (twice daily inside the booth)

Booth Seminar

- Twice daily, seminars will take place inside the booth providing an overview of the TransferJet concept, technology, applications and products as well as the various consortium activities, and the latest specification, iSDIO TransferJet Addendum.

About the TransferJet Consortium

The TransferJet Consortium was established in 2008 by a group of international companies with the common goal of developing the technology, products and services based on **TransferJet** wireless technology. The consortium was registered as a Japanese incorporated association on September 2011. The basic specifications were registered as ISO/IEC 17568 on March 2013. The TransferJet Consortium focuses on the development of the specifications, compliance testing processes and tools, certification, as well as marketing and PR activities to promote the **TransferJet** concept and technology worldwide. Visit www.transferjet.org for more details.
